Guiding Question

In what ways can word study help increase academic skills?

Today's Agenda

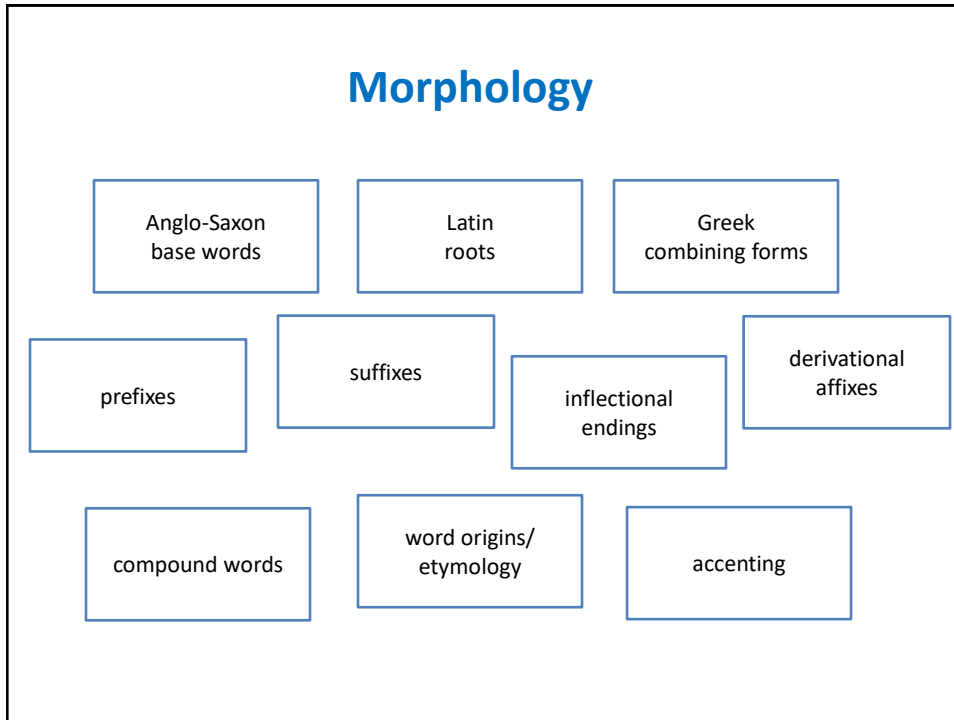

- Why teach morphology
- Overview of the layers of language
- Early morphology concepts
- Ways to practice in class or tutorial

Morph | ology

Gr. form, structure | Gr. study of

- Morphology is the **study of the structure of words** as it relates to meaning.
- It is **structural analysis**.
- Morphology may also include the study of word history or **etymology**.

Morphology

Why teach Morphology ?

Vocabulary development

- When students come across an unfamiliar word in text, they can break it up and use their knowledge of the root, prefixes, and suffixes to infer the meaning of the whole word.

Reading accuracy

- Morphological awareness facilitates oral reading accuracy because it helps students with pronunciation. For example, if they can identify the prefix **mis** and the base word **hear**, they will more likely read *mishear* correctly, instead of keeping the sh together and reading it as /sh/.

Spelling

- Knowledge of morphemes helps students spell more accurately. For example, the words *best* and *dressed* rhyme, but awareness of the past tense suffix helps us know that *dressed* needs the morpheme -ed to spell the final sound /t/.

Comprehension

- Since morphological awareness increases vocabulary and decoding efficiency, more cognitive resources can be used to process the text as a whole. Further, as vocabulary and word knowledge increase, comprehension increases.

“Knowing the etymology or the roots of a word is a very powerful aid to **reading, shedding light on a word's **pronunciation**, **its spelling**, and **its meaning**.”**

S. Shaywitz, 2003

Basic Terms

morpheme: smallest unit of **meaning** in a word

Ex: *biographers*: 4 morphemes: *bio-graph-er-s*

Types of Morphemes:

root or combining form: inspector, micro/scope

base word: unlikely

prefix: **re-**, **un-**, **dis-**

suffix: **-able**, **-ed**, **-ly**

} **affixes**

derivation: a word formed from an existing word, root, or affix: **benign**, **benefit**, **benefactor**

Base word vs. Root word

| | |
|---|--|
| <ul style="list-style-type: none"> A base word is of Anglo-Saxon origin It can stand alone <p>look read make bend</p> <p>bending, bendable</p> | <ul style="list-style-type: none"> A root word is of Latin origin It is unlikely to stand alone <p>spect aud bene sens</p> <p>insensitive, sensible</p> |
|---|--|

3 Layers of Language

- **Words of Anglo-Saxon origin ~25%**
 - Common, short, everyday word used frequently in ordinary situations
 - Majority are phonetic for reading (*farm, boat, tree*)
 - Make up the majority of Dolch and Fry lists
 - Non-phonetic words are taught as sight words (said, enough, was)
- **Words of Latin origin >55%**
 - Sophisticated, academic words (*inspection*)
 - Latin roots are unlikely to stand alone
 - Can have prefix + root + suffix(es)
 - The Latin root usually receives the stress: a - tract' - ive
- **Words of Greek origin ~11%**
 - Specialized words used mostly in sciences, medicine, technology
 - Morphemes are called **combining forms** since they do not predictably function as roots and affixes (*microscope*)

"Silent letter patterns such as *kn, wr, ough, ould, and igh* are remnants of Anglo-Saxon, in which those 'silent' letters were sounded."

-McCardle & Chhabra, 2004

Practice – Prefix UNO

Directions for UNO

- Deal 5 cards to each player. Leave remaining cards face down in a pile in the center of the table.
- Turn one card over face up on the table.
- The first player is up. On top of the card in the middle of the table, he/she places a card from his/her hand that either has the same prefix or the same number. He/she reads the word, and it is then the next player's turn.
- If the player does not have a matching card, he may play an UNO, Skip, or Pick2 card if he/she has one. If an UNO card is played, that player may change the prefix and announce it to the other players. If the player has no card to play, he/she picks a card from the pile.
- Take turns. The winner is the player who has no cards left in his/her hand.

(*the UNO cards are in a separate document)

Common Suffixes for Initial Instruction

| Suffix | Meaning | Example(s) |

Directions for the “boxing” game

- Make a grid of words using “table.”

- With a marker or annotation tool, draw a line all the way around the outside.
- Each player uses a different color. When it is your turn, draw one line and read the 2 words on either side of the line.
- Take turns drawing one line per turn (and reading the 2 words ☺). Try to be the one to draw the last line to close in the box. If you close it, put your initials in it and take another turn. The player with the most boxes claimed is the winner.
- This is a strategy game like checkers, but its real goal is to practice reading target words aloud in a fun way.
